## **HomeSafe Alliance Announces Leadership Transition, New CEO as Company Moves to Operations Phase**

**HOUSTON-** HomeSafe Alliance proudly announces that Bobby Nicholson has been appointed HomeSafe CEO, effective January 1, 2024. As the Global Household Goods (GHC) program moves from IT development into phase-in operations, HomeSafe is executing a planned transition of leadership. Nicholson assumes responsibility for the overall leadership of the program and the HomeSafe team during this next stage of GHC execution.

HomeSafe is dedicated to providing efficient, high-quality moves using cutting-edge technology to improve the domestic and international relocation process for military personnel and their families.

Nicholson is well suited to lead HomeSafe's effort to dramatically improve the military move experience. Over his 16 years at HomeSafe's parent company KBR, he has demonstrated his ability to effectively helm customer-focused logistical programs with significant impact on the men and women of our military across the globe. Prior to joining KBR, he successfully held leadership positions for 29 years in the U.S. Army, culminating as a Colonel in the Corps of Engineers and completing a Master of Strategic Studies from the U.S. Army War College.

"I excitedly welcome this opportunity to serve as HomeSafe CEO and lead our mission to enhance the quality of life for our nation's service members and their families," said Nicholson. "I have been eagerly engaging with HomeSafe's customers, industry partners, and team members, and I look forward to working with all of them as we bring HomeSafe's innovative solution to life."

The seamless transition of HomeSafe leadership will not cause a delay in the current program timeline and allows for normal course of business to continue. IT validation testing, planned for January, will ensure full integration and compatibility between HomeSafe's IT system *HomeSafe Connect* and the U.S. government's new system *MilMove*. Upon the successful completion of this testing, everyone at HomeSafe looks forward to performing the first moves in 2024.
